

Avascular Necrosis-AVN

sanskritiias.com/pt-cards/avascular-necrosis-avn

- In the Avascular Necrosis blood supply to the bone tissue is reduced or interrupted, which leads to fracture and destruction of bone tissue. It is also known as **Osteonecrosis and death of bone tissues**. Generally, people in the age group of 30-50 are most affected by it.
- **In the initial stage, symptoms are usually not visible.** In severe cases, pain occurs in the affected bone due to weight or injury.
- **It can be caused by long-term use of high steroidal drugs and excessive consumption of alcohol.**
- Recently, All India Institute of Medical Sciences has sought approval from the Indian Council of Medical Research for a comprehensive investigation of cases of Avascular Necrosis detected in patients cured of **Covid 19**.
